Vinyl Picture Window

Options

- Fin, flange or equal leg frame mountings for diverse construction types and applications
- PVC mull snap covers to match window finish (exterior & interior) for multiple muller units
- Custom sizes and colonial grids work with between glass options
- NON-IMPACT GLASS available: 7/8" insulated glass for non-impact applications (3/16" ann. outboard - 1/2" air space - 3/16" ann. board)

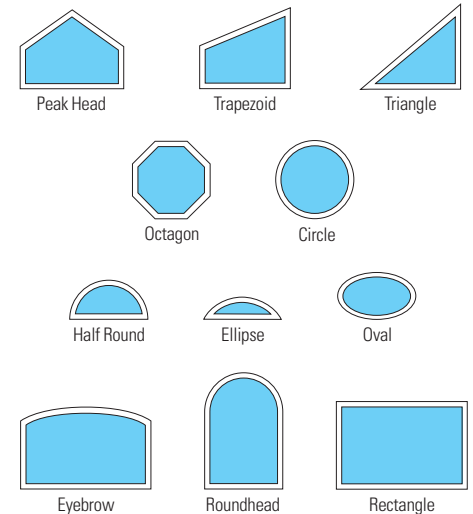

Colors

- Popular glass tints available: gray, bronze, green, for additional colors please contact an AWP representative
- AWP vinyl windows are available in both white and almond

Shapes

- AWP vinyl picture windows are available in the following architectural shapes

Proven, Weather-Tested Vinyl

- Specially-formulated to perform in UV intense, hot-humid climates
- Formulated for best durability and impact-resistance
- Heat build-up tested and proven to exceed AAMA specifications
- Vinyl window profiles meet AAMA Certified Standards
- Non-corrosive to last in coastal environments
- Added aluminum reinforcement used at key locations to reduce deflection and improve structural impact performance

Vinyl Is More Energy-Efficient

- PVC windows offer lower U-factors than aluminum frame windows. Typical vinyl window has a U-Factor of 0.35 compared to Aluminum typical U-Factor of 0.60

High-Performance Engineered to Meet Coastal Hurricane Impact Codes

- Tested and certified to meet Hurricane-Impact Codes (Miami-Dade, Broward County)
- Specifically designed to be Hurricane Resistant (DP65/65 rating)
- PVC frames and sash are fully welded to provide strength and prevent air and water leakage
- Frame and Sash designed with multiple internal hollows to accept added reinforcement to achieve Impact ratings

AWP vinyl windows are tested and certified to meet Hurricane-Impact Codes and are superior in corrosive, coastal environments.
